

TECHNICAL ENGLISH FOR ENGINEERING TEAMS

CLEAR ENGLISH. CONFIDENT ENGINEERS.

*Technical English training that speaks your
team's language — literally.*

marcode.org

ENGINEERS ARE GREAT AT WHAT THEY DO. SO WHY DOES ENGLISH SLOW A PROJECT DOWN?

A misread requirement gets built the wrong way. A report that takes three rounds of clarification delays a decision. An engineer who understands more English than they speak stays silent on a client call, and the client hears from someone else instead.

None of this is a language problem in the way people assume. It is a gap between what an engineer knows and what a stakeholder understands, and it has a business cost: rework, delay, and expertise that never reaches the table.

OLIVIA AUGUSTIN - CIVIL ENGINEER,
TEFL-CERTIFIED ENGLISH TEACHER,
UNIVERSITY GUEST LECTURER

I help engineering teams close that gap. I teach English the way I think — like an engineer, not a linguist, with patterns and logic instead of memorized rules. Training built by an engineer, for engineers.

Since 2019, I've worked with engineers across international consultancies and local construction firms — in infrastructure, HSE, structural design, and renewable energy — across four continents. My teaching style is practical and systems-based. Whether it's a site report, a cross-border meeting, or filling grammar gaps, I give teams the tools to get the work understood, in English.

THE TEAM LANGUAGE AUDIT

Before any programme starts, I assess each engineer's working level in English and give you a written summary of where the team stands. You receive a group-level report — each engineer receives their own feedback directly.

PRICE	€50 per engineer, min €200
TERMS	Introductory rate, 2026
CREDIT	€50 per engineer, credited if they join a programme within three months

- 1 Assess each engineer's working level in English.
- 2 Group by level, so the right people train together.
- 3 Report — a group-level summary, to you.

Three situations, one training partner: building a foundation, fixing a specific problem, or keeping a team sharp between projects.

One instructor throughout, so one NDA covers the whole engagement.

CUSTOM TEAM PROGRAMME

Ten weekly sessions of 55 minutes, built around the work your team actually does — starting with a scoping call with the team lead.
Renewable in ten-session blocks.

PRICE	€5.400 for 2-3
ADDITIONAL	+€450 per engineer, up to 6
MAXIMUM	€6.750, 6 engineers

1:1 TECHNICAL ENGLISH

Ten sessions of 55 minutes, built around one engineer's role and projects — for senior engineers who want sharper client communication, or engineers building the basics faster than a group allows.

PRICE	€1.520 per engineer
-------	---------------------

"I am in regular contact with customers. As a result of Olivia's tutoring, my confidence grew, and therefore our customer service significantly improved."

Michael v/d K. — Mechanical Engineer, Netherlands

CORE PROGRAMME

Ten weekly sessions of 85 minutes to build a solid Technical English foundation. Fixed curriculum, private cohort. A defined end — teams that want more move to Custom.

PRICE	€5.400 per cohort
GROUP SIZE	2-6 engineers

WEEKLY CONVERSATION PRACTICE

Ten weekly sessions of 55 minutes to keep your team sharp. Engineers bring real work — a report, a call to debrief — and I guide as we go.

PRICE	€750 per engineer
GROUP SIZE	4-6 engineers

1:1 TECH BREAK

Ten weekly sessions of 25 minutes. A short technical conversation, built to fit a working week the way a coffee break does.

PRICE	€650 per engineer
-------	-------------------

Not only for non-native speakers. Native English-speaking engineers on international teams benefit too — working alongside colleagues who communicate in a second language is its own skill.

SUPPORT YOUR ENGINEERING TEAM'S SUCCESS — WITH THE ENGLISH THEY ACTUALLY NEED.

PRACTICAL DETAILS

DELIVERY	Online, live session
SCHEDULING	10 lessons in 10 weeks 1:1 programmes add 2 reserve weeks for rescheduling
REPORTING	Group summary to you Individual results go to the engineer only
CERTIFICATES	Completion certificate for every participant
PRICES	All prices shown exclude VAT

Built for systematic thinkers. Hands-on knowledge, custom-made training, from engineer to engineer.
