

CLEAR ENGLISH. CONFIDENT ENGINEERS.

Technical English training that speaks your
team's language—literally.

www.marcode.org

Engineers are great at what they do. So why does English slow them down?

Even the most brilliant engineers can get stuck when it comes to communication. Explaining complex ideas in plain English, speaking up in meetings, or writing clear reports takes more than just vocabulary—it takes confidence, structure, and practice.

Many engineers are perfectionists with no time for fluff. And when they're working across borders, cultural differences can make things even trickier.

My courses are designed to remove that friction—so your engineers can focus on doing what they do best, and say it with clarity.

I help engineers learn that kind of English that gets the job done.

I'm Olivia Augustin—a civil engineer, certified English as a 2nd language teacher, expat, and university guest lecturer.

I've spent years helping international engineers communicate clearly, confidently, and without the headache that normally comes with language learning. Because I'm an engineer myself, I get how their brains work—and I've built every course to match that mindset.

My teaching style is practical, systems-based, and focused on real-world results. Whether it's speaking in meetings, writing reports, or navigating global teamwork, I give engineers the tools to get the job done—in English.

Group Course Technical English: 'The Fast and Furious Edition'

A 10-week online course for engineers who want to stop overthinking and start communicating clearly in English—fast.

Focused on Technical and Business English for international projects, this course helps engineers speak up in meetings, write with precision, and build confidence without boring grammar drills.

Built for busy schedules, designed by an engineer.

"The lessons I had with Olivia were excellent, no traditional lessons, but a fun atmosphere, with great examples and great cultural experience, I recommend it!" –Rudolf J., Civil Engineer, Brazil

"Working with Olivia and the other group members was awesome. Olivia has an amazing talent for explaining „complicated stuff“ easily and understandable. She created the course very interesting and funny, I felt comfortable." –Amy K., Miviso GmbH, Austria

*The group courses aren't just for non-native speakers. Native English-speaking engineers who work in international teams also benefit—by gaining insight into the language challenges their teammates face and learning how to communicate more clearly across language and cultural lines.

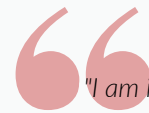

One-on-One Coaching: The Foundation

A personalized coaching program for engineers who need serious results.

We focus on your projects, your job, and your language goals—whether that's writing reports, dealing with subcontractors, or leading client calls.

It's structured, flexible, and tailored to help you build rock-solid English skills that actually stick.

"I am in regular contact with customers. As a result of Olivia's tutoring, my confidence grew, and therefore our customer service significantly improved." –Michael v/d K., Mechanical Engineer at Lindor, Netherlands

"I look back on fun and educational lessons. My knowledge of the English language has noticeably improved." –Arne v/d K., Process Engineer, Netherlands

Group Course Conversational Training: The Convo Club

Weekly online conversation sessions designed for engineers who want to speak more naturally, stay fluent, and feel more confident in English.

Each one-hour session focuses on real topics engineers actually discuss—without the pressure, but with the relaxed, collegial vibe of a coffee break with international teammates.

Available for different proficiency levels to ensure meaningful practice for everyone.

One-on-One Conversational Training: The 25 Minutes

Short, focused coaching sessions that fit even the tightest schedule.

In just 25 minutes, you'll practice speaking, get direct feedback, and build confidence on the spot.

Perfect for engineers who want to improve quickly, stay consistent, and fit English into a busy workday.

“*Olivia is not a teacher standing in front of me, shoving grammar down my throat. (...) she's looking over my shoulder, helping me every step of the way. It feels like a coffee break.*” –Philip G., HSE Engineer, Germany

“Olivia is a great English teacher! I enjoyed my sessions with her. Olivia's approach is really different from that of more traditional English teachers.” Liesbeth S., GM, Netherlands

Support your engineering team's success—
with the English they actually need.
